The above diagrams illustrate daily and weekly bandwidth snapshots for:

MOFNE

The total leased bandwidth is **100Mbps**

Bandwidth Utilization: (High)

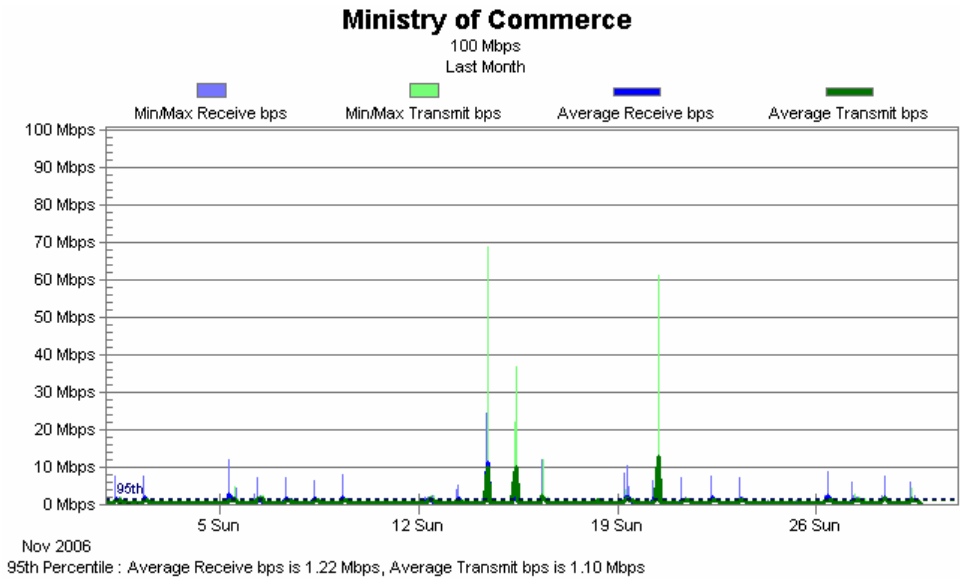

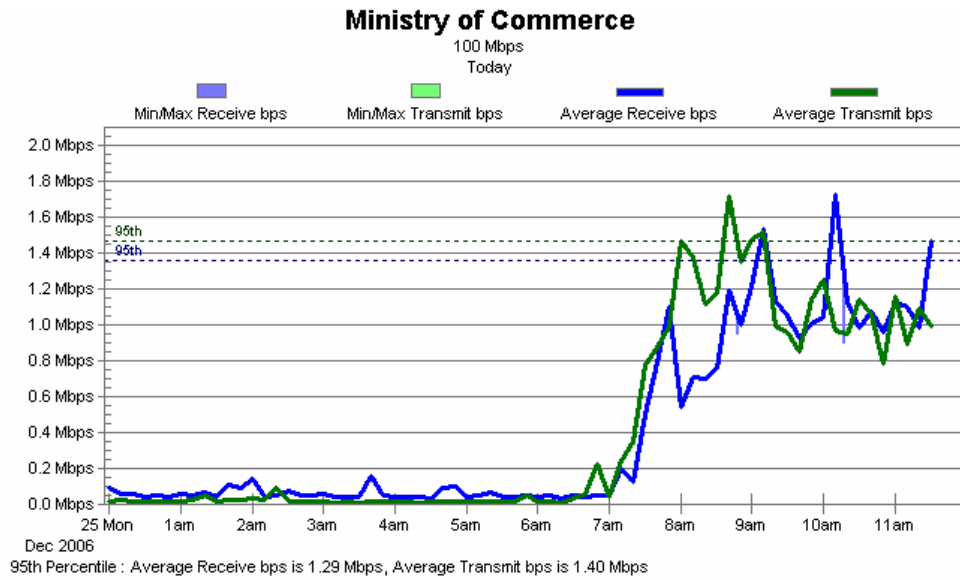

The downstream bandwidth utilization is between **70-80Mbps**

The upstream bandwidth utilization is between **70-80Mbps**

Available bandwidth:

The available downstream bandwidth is between **20-30Mbps**

The available upstream bandwidth is between **20-30Mbps**

The above diagrams illustrate daily and weekly bandwidth snapshots for:

MOC

The total leased bandwidth is **100Mbps**

Bandwidth Utilization: (Low)

The downstream bandwidth utilization is approximately **2Mbps**

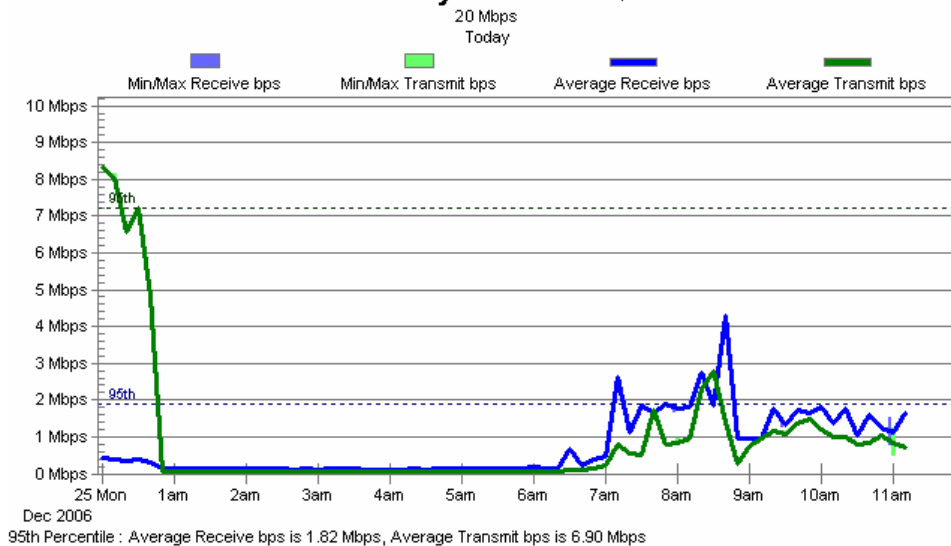

The upstream bandwidth utilization is approximately **2Mbps**

Available bandwidth:

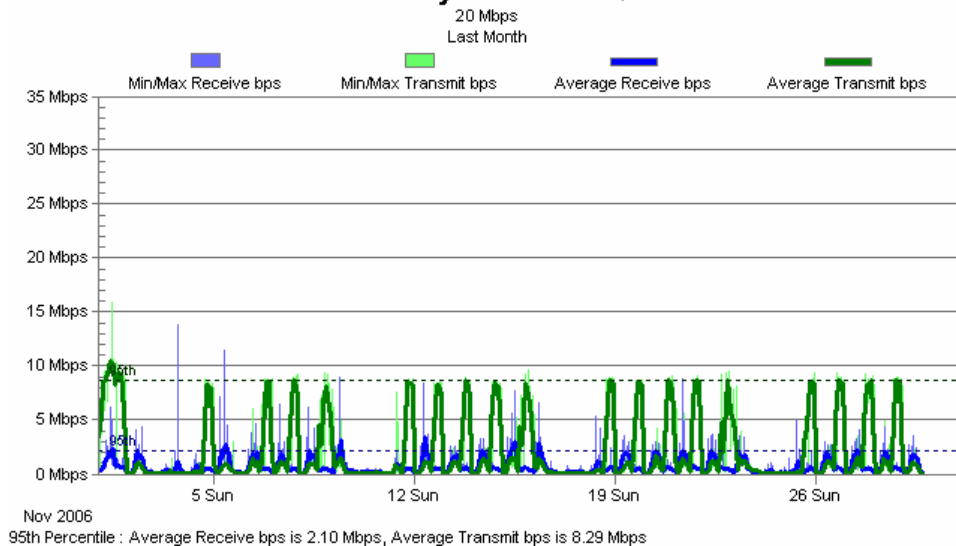

The available downstream bandwidth is approximately **98Mbps**

The available upstream bandwidth is approximately **98Mbps**

Ministry of Health HQ

Ministry of Health HQ

The above diagrams illustrate daily and weekly bandwidth snapshots for:

MOH

The total leased bandwidth is **20Mbps**

Bandwidth Utilization: (Low)

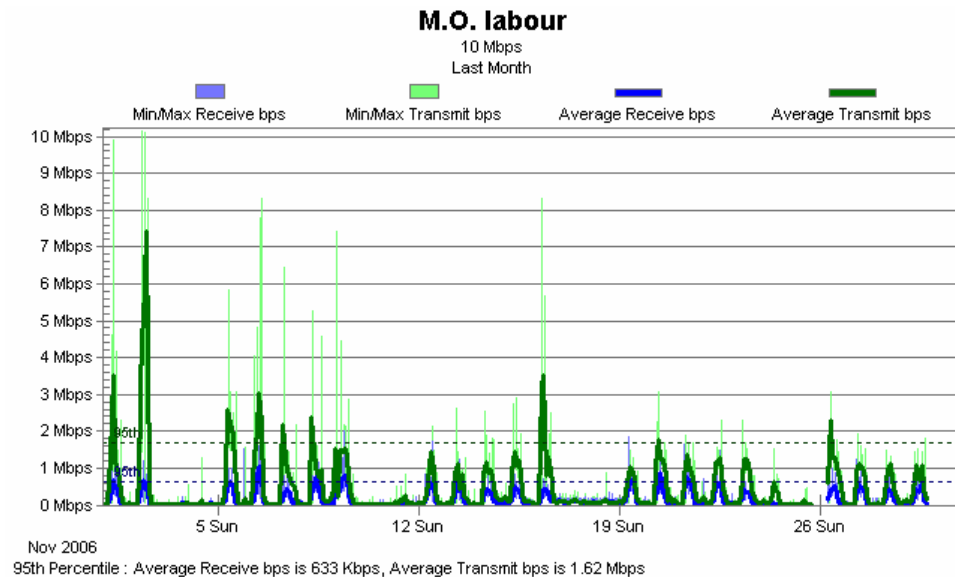

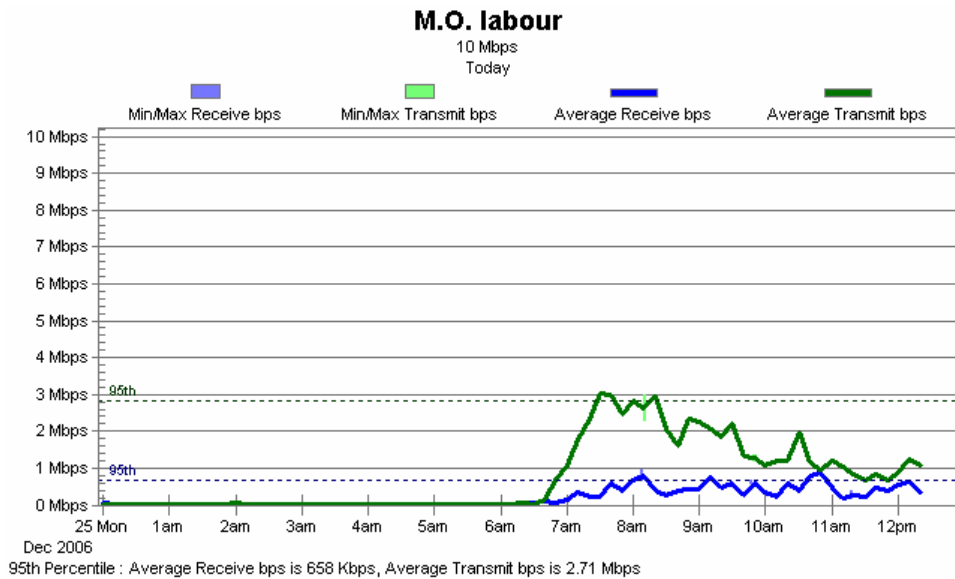

The downstream bandwidth utilization is between **2-3Mbps**

The upstream bandwidth utilization is approximately **10Mbps**

Available bandwidth:

The available downstream bandwidth is between **17-18Mbps**

The available upstream bandwidth is approximately **10Mbps**

The above diagrams illustrate daily and weekly bandwidth snapshots for:
MOH
 The total leased bandwidth is **10Mbps**

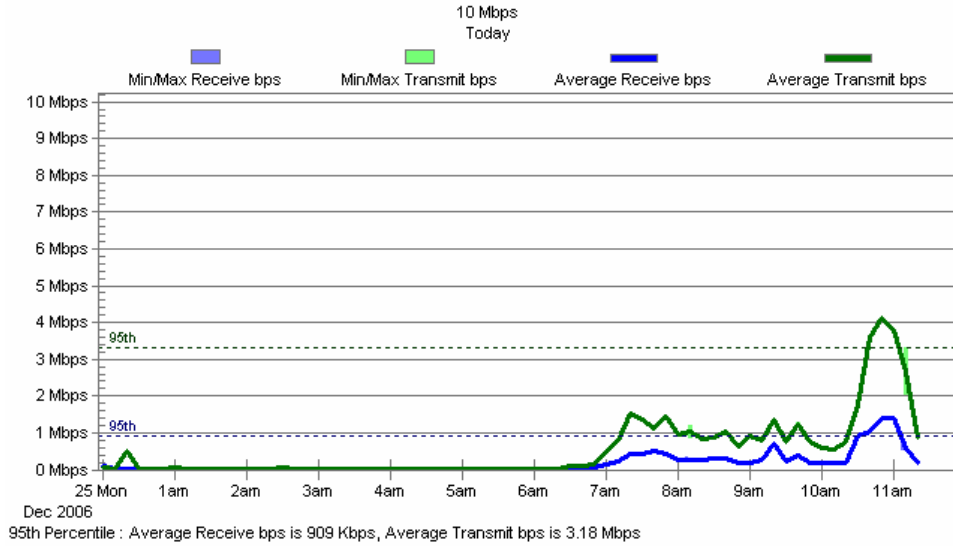

Bandwidth Utilization: (Low)

The downstream bandwidth utilization is approximately **1Mbps**
 The upstream bandwidth utilization is approximately **3Mbps**

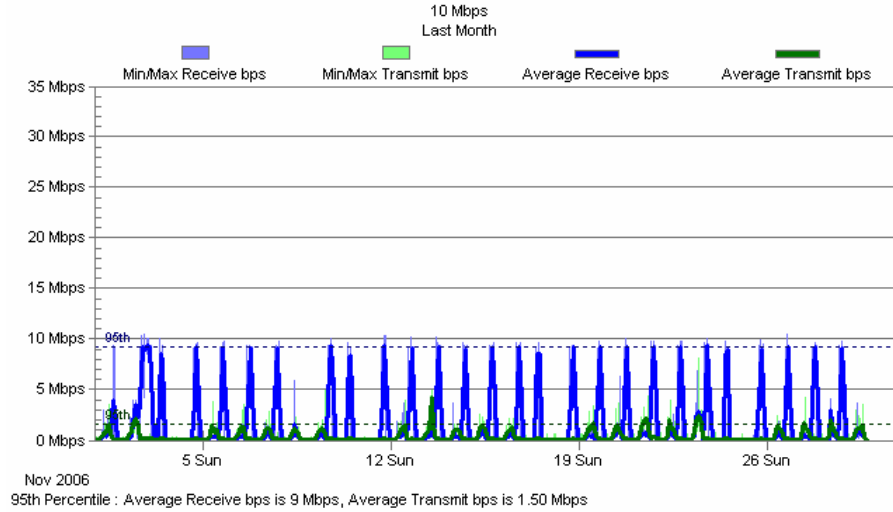

Available bandwidth:

The available downstream bandwidth is approximately **9Mbps**
 The available upstream bandwidth is between **7Mbps**

M.O. Education ISA Town

M.O. Education ISA Town

The above diagrams illustrate daily and weekly bandwidth snapshots for:

MOH

The total leased bandwidth is **10Mbps**

Bandwidth Utilization: (High)

The downstream bandwidth utilization is approximately **10Mbps**

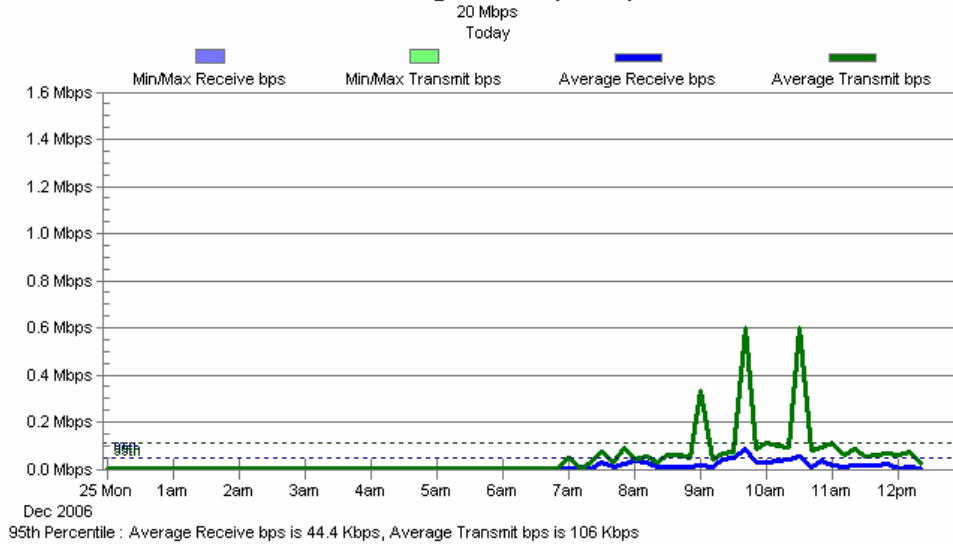

The upstream bandwidth utilization is between **3-4Mbps**

Available bandwidth:

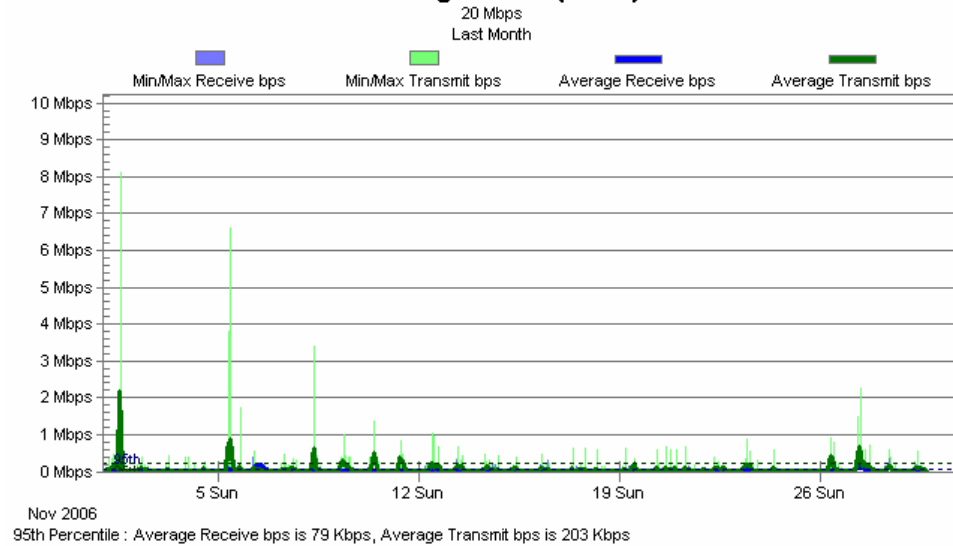

The available downstream bandwidth is approximately **0Mbps**

The available upstream bandwidth is between **17-18Mbps**

Training Center (MEW)

Training Center (MEW)

The above diagrams illustrate daily and weekly bandwidth snapshots for:

MEW

The total leased bandwidth is **20Mbps**

Bandwidth Utilization: (Low)

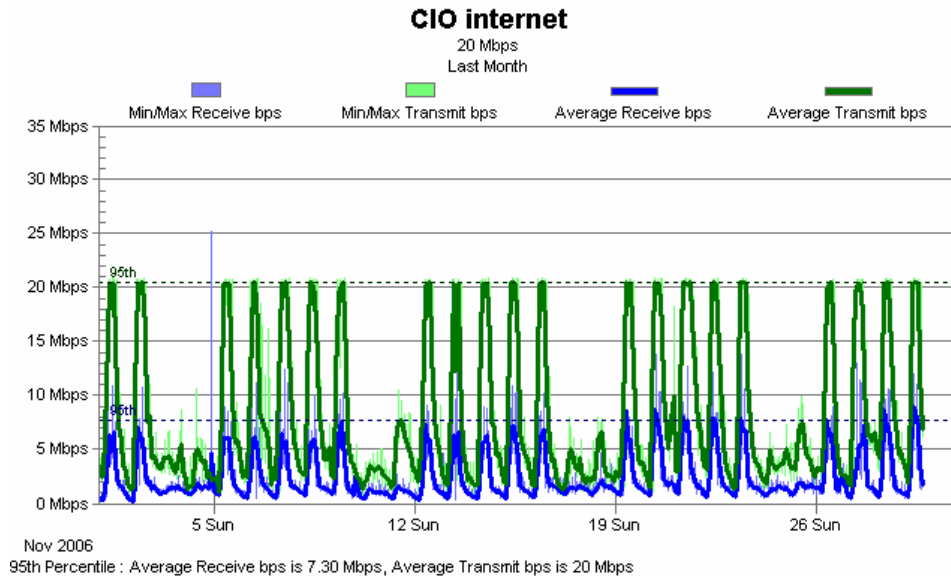

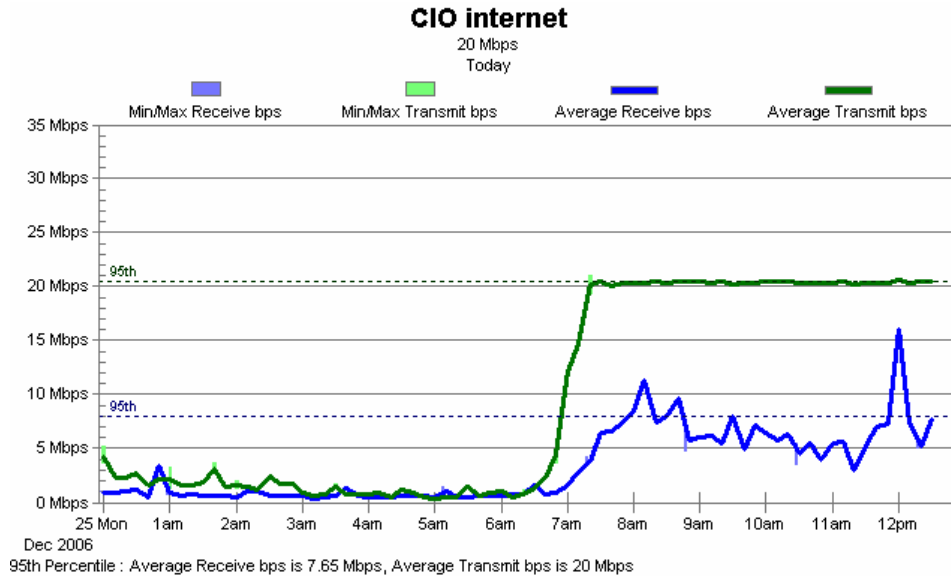

The downstream bandwidth utilization is approximately **0.6Mbps**

The upstream bandwidth utilization is approximately **0.1Mbps**

Available bandwidth:

The available downstream bandwidth is approximately **19.4Mbps**

The available upstream bandwidth is approximately **19.9Mbps**

The above diagrams illustrate daily and weekly bandwidth snapshots for:

CIO Internet

The total leased bandwidth is **20Mbps**

Bandwidth Utilization: (High)

The downstream bandwidth utilization is approximately **10Mbps**

The upstream bandwidth utilization is approximately **20Mbps**

Available bandwidth:

The available downstream bandwidth is approximately **10Mbps**

The available upstream bandwidth is approximately **0Mbps**
